Growing Importance of Nursing Home Ratings
 Receiving a better than average 5-star rating has never been more important to nursing homes. These ratings are increasingly used by consumers, regulators, insurers and other payers, and provider networks to select which facilities they will consider having relationships with. Nursing homes may not even be able to obtain sufficient referrals or receive Medicare and Medicaid funding in the future if they do not have at least a 3-star rating.

Health Inspection 5 Star Rating: ★★★★★ Previous Month: ★★★★★ 3 Months Prior: ★★★★★ [Help](#)

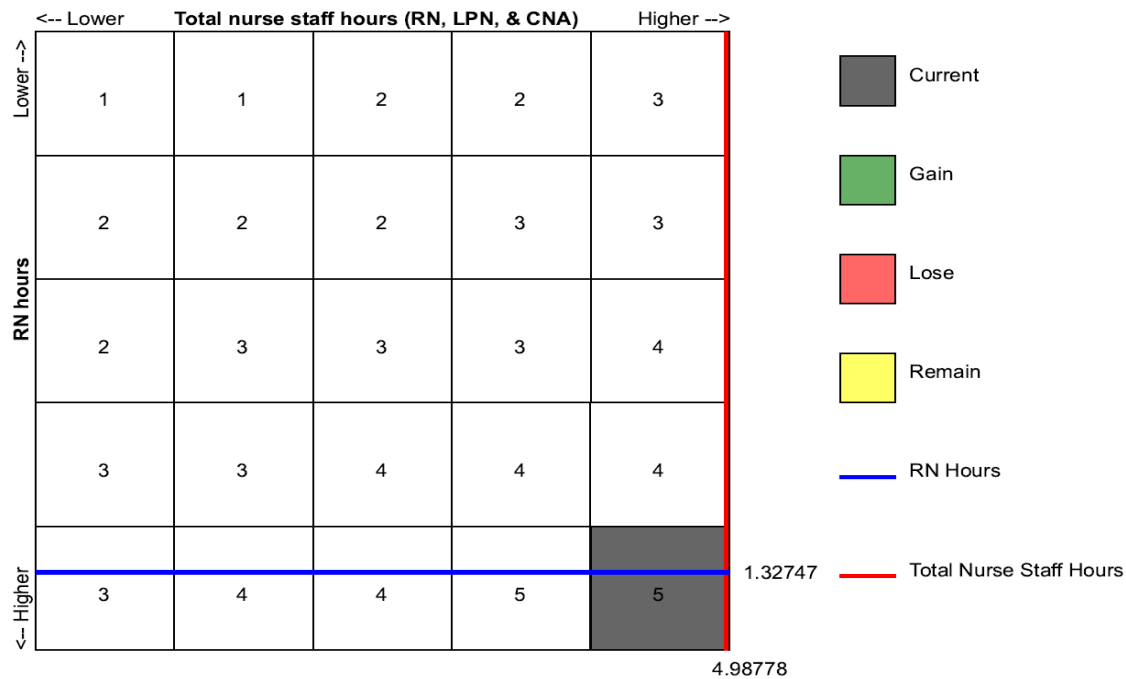

The health inspection rating is based on the number, scope, and severity of deficiencies identified during the 3 or 2 most recent annual inspection surveys and from complaint investigations during that same time period. More than one revisit will have a negative impact on the score for a survey cycle. The total score from each survey cycle is weighted so that the more recent survey cycles have more impact on the overall total score as compared to the older survey cycle. Staffing 5 Star Rating: ★★★★★ Registered Nurse (RN) Staffing 5 Star Rating: ★★★★★ Previous Month: ★★★★★ 3 Months Prior: ★★★★★ [Help](#)

The number in the box where the blue (i.e. adjusted RN hours) and red (i.e. adjusted total nurse staff hours) lines intersect represents the numbers of stars this facility receives for staffing. The columns going from left to right represents the number of stars for total nurse staff hours. The rows going from top to bottom represent the number of stars for RN hours. [Staffing matrix explanation](#) [View Staffing 5 Star Trend](#)

Interpretation

- This facility currently has a 5 star staffing rating of 5.
- Neither the total nurse staff hours or RN hours are close to a cut point and thus do not have high potential to change the 5 star staffing rating.

To see how a change in your resident mix or reported hours could change your staffing rating, use the [Staffing Scenario Worksheet](#)

Use [Quality Metrics](#) (login required using your MyLeadingAge username and password) and the [Nursing Home Trend Report](#) to compare your adjusted staff hours to your peers.

Quality Measure 5 Star Rating: ★ ★ ★ ★ ★ Previous Month: only updated quarterly 3 Months Prior: ★ ★ ★ ★ ★ [Help](#)

Long Stay Quality Measure 5 Star Rating: ★ ★ ★ ★ ★

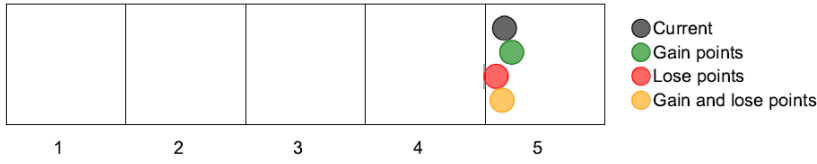

Short Stay Quality Measure 5 Star Rating: ★ ★ ★ ★ ★

Quality Measure	Rate	Points	Better ← → Worse	Interpretation	Bottom Cut Point	Top Cut Point
Higher Rate is Better						
Successful community discharge (short-stay)	54.75	105		Decreasing this QM rate by 2.6% or by approximately 1.43 percentage points could result in losing 15 points.	53.32	56.81
Functional Improvement (short-stay)	84.812	150		Decreasing this QM rate by 2.4% or by approximately 2.052 percentage points could result in losing 15 points.	82.76	100
Lower Rate is Better						
Antipsychotic Medications (short-stay)	0	100		Potential To Lose Points Although full points are currently being attained for this QM, having a single person flag for this QM would result in losing 20 points.	0	0
New or Worsening Pressure Ulcers (short-stay)	3.9	20		Potential To Gain Points Decreasing this QM rate by 22.8% or by approximately 0.89 percentage points could result in gaining 20 points.	3.01	100
Catheter (long-stay)	2.376	40		Potential To Gain Points Decreasing this QM rate by 8.3% or by approximately 0.196 percentage points could result in gaining 20 points.	2.18	3.56
ADL Decline (long-stay)	21.053	30		Decreasing this QM rate by 6% or by approximately 1.263 percentage points could result in gaining 15 points.	19.79	23.23
Urinary Tract Infection (long-stay)	3.401	40		Decreasing this QM rate by 19.7% or by approximately 0.671 percentage points could result in gaining 20 points.	2.73	4.52
Antipsychotic Medications (long-stay)	6.04	135		Decreasing this QM rate by 20.7% or by approximately 1.25 percentage points could result in gaining 15 points.	4.79	7.49
High Risk Pressure Ulcers (long-stay)	5	80		Increasing this QM rate by 16.8% or by approximately 0.84 percentage points could result in losing 20 points.	3.78	5.84
Moderate to Severe Pain (long-stay)	9.952	40		Increasing this QM rate by 20% or by approximately 1.988 percentage points could result in losing 20 points.	6.85	11.94
ED Visits (short-stay)	7.197	120		Increasing this QM rate by 6.7% or by approximately 0.483 percentage points could result in losing 15 points.	6.41	7.68
Moderate to Severe Pain (short-stay)	11.475	60		Increasing this QM rate by 16.9% or by approximately 1.945 percentage points could result in losing 20 points.	8.22	13.42
Number of outpatient emergency department (ED) visits per 1,000 resident days (long-stay)	0.444	135		Decreasing this QM rate by 21.9% or by approximately 0.097 percentage points could result in gaining 15 points.	0.347	0.497
Number of hospitalizations per 1,000 resident days (long-stay)	0.585	150		Decreasing this QM rate by 100% or by approximately 0.585 percentage points could result in gaining 0 points.	0	0.851
Mobility Decline (long-stay)	23.259	45		Increasing this QM rate by 2.9% or by approximately 0.681 percentage points could result in losing 15 points.	21.54	23.94
Hospital readmission (short-stay)	17.511	135		Potential To Lose Points Increasing this QM rate by 1.1% or by approximately 0.189 percentage points could result in losing 15 points.	15.01	17.7
Injurious Falls (long-stay)	1.342	100		Potential To Lose Points Increasing this QM rate by -0.2% or by approximately -0.002 percentage points could result in losing 20 points.	0	1.34

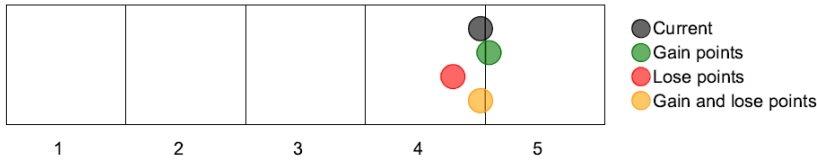

Note: The QM rates and points in this table have been rounded to either one, two, or three decimal places due to space constraints. However, the full QM value has been used to calculate facility scores and rankings. To view the full QM cut point tables, [click here](#).

Overall 5 Star Rating: ★★★★★ Previous Month: ★★★★★ 3 Months Prior: ★★★★★ [Help](#)

Follow the steps below to see how your current rating is calculated and 2 scenarios could possibly change your overall 5 star rating.

Step	Instruction	Current	Likely to Gain	Likely to Lose
1	Start with the health inspection five-star rating.	5	5	5
2	Add one star to the Step 1 result if staffing rating is four or five stars and greater than the health inspection rating, subtract one star if staffing is one star. The overall rating cannot be more than five stars or less than one star.	+0	+0	+0
3	Add one star to the Step 2 result if quality measure rating is five stars, subtract one star if quality measure rating is one star. The overall rating cannot be more than five stars or less than one star.	+0	+0	+0
Note	If the health inspection rating is one star, then the overall quality rating cannot be upgraded by more than one star based on the staffing and quality measure ratings.	-0	-0	-0
Final Overall Star Rating		5	5	5
